OCCASIONAL CHAIRS

Outdoor occasional chairs are like a dollop of cream on a piece of chocolate cake. They're the finishing touch that elevates the experience from tasty to delicious. They might be a little decadent but we're confident they won't leave you with any feelings of regret. We believe that every space deserves that touch of decadence, the addition of something that takes it from great to amazing and occasional chairs do just that.

Occasional chairs are where we really get to see creativity in its fullest, with the freedom of stand-alone pieces allowing designers more flexibility in styling and crafting these incredible pieces. In some cases, it results in a chair that stands squarely on its own four feet with little reference to the rest of the range, while in others it's about the small details, a curved arm rest or slightly wider base.

The outdoor occasional chair range uses wooden, aluminium and wicker materials allowing for contrasting pieces that adapt to contemporary and traditional designs, with all materials, from the frame to the foam and fabric, being selected for maximum performance outside.

Outdoor occasional chairs allow you to live everyday outdoor life, in style.
