Crafted in Spain, designed for Australia

Artisan Exterior's glass mosaic pool tile collections are designed in collaboration with Spain's leading manufacturers, using up to 100% recycled glass. Produced with leading print technology and crafted to withstand Australian conditions, each mosaic combines durability with refined detail. The collections offer versatility across pools, water features, outdoor showers, and splashbacks, while uniting European artistry with the practical needs of Australian outdoor living. Every surface is created with both sustainability and craftsmanship in mind, delivering long-term performance, striking design, and the flexibility to complement a wide range of architectural styles. All Artisan Exterior pool tiles are also supported by a 5-year residential manufacturer's warranty, ensuring peace of mind alongside design freedom.

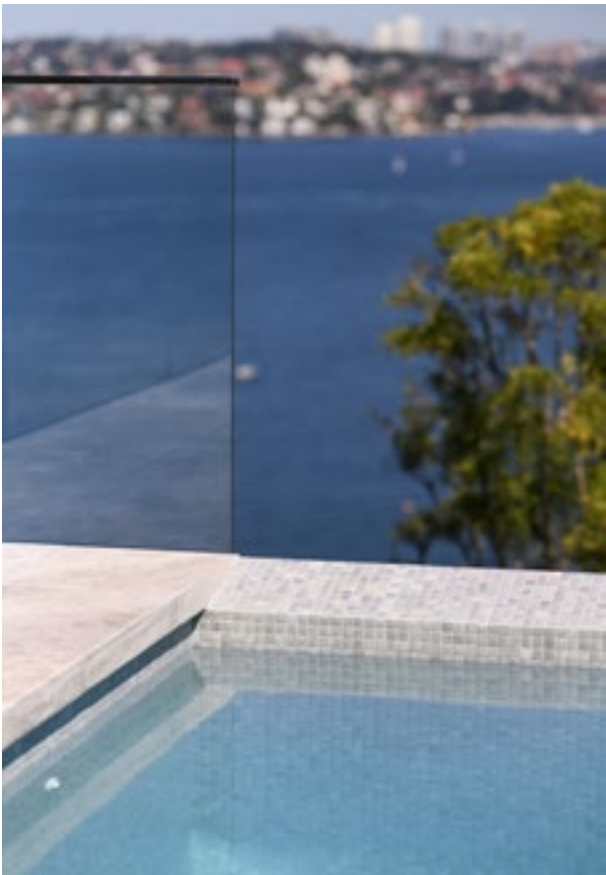

The range includes Hisbalit Mosaico Series, exclusive to Artisan Exterior, with over 50 years of expertise in crafting mosaics. Backed by an internationally patented Thermo-Polymer Backing System, Hisbalit collections span Australian, Coast, Unicolour, Niebla, and Concept & Luxe, with options in pearlescent, gchrome, iridescent, gloss and matte opaque finishes and blends. Formats are available in 23mm and 40mm, across a broad colour palette.

The One Series complements this with collections inspired by nature. From the Earth and From the Sea feature organic prints in gloss and matte finishes, offered in 25mm and 50mm formats. Designed to capture subtle variations in colour and texture, these mosaics bring a natural aesthetic with select designs available exclusively through Artisan Exterior.

This document provides the technical specifications to guide your choice. For further details, our team is ready to support your projects with samples and in-studio expertise across ACT, NSW, and QLD.

Working with Glass Pool Tiles: Key Considerations

MINOR IMPERFECTIONS IN GLASS POOL TILES

Some glass pool tile ranges are ultra-thin (4 mm) and made from 100% recycled glass (Hisbalit), which means slight chips, surface irregularities, or minor misalignment of some pieces are expected on a sheet. These characteristics result from the delicate manufacturing process using 100% recycled glass, the flexible backing system, and the thin grout design that enhances the overall premium look of “more tile, less grout.” Any small imperfections naturally blend in once the tiles are installed and grouted. If a piece shows a noticeable flaw, installers are to simply remove and replace it during installation, ensuring that no visible difference remains in the finished surface.

Note: These variations in glass pool tiles are part of the sustainable nature of recycled glass.
