# COBBLESTONES

Steeped in a history of European craftsmanship, cobblestones are a great paving solution that exude character and expression.

Made in a wide range of materials and incredibly well suited for any high traffic areas, they are a very strong, slip resistant and versatile product.

Cobblestones, due to their size and adaptability during installation, can be laid in awkward or narrow spaces as well as curved or steep areas making them the ideal choice for driveways, courtyards or public spaces.

Cobblestones can also be laid in a variety of formats, such as herringbone, fan, straight set or brickbond. They are perfect for creating circular spaces and to match specific designs or styling requirements.

Cobblestones can also help layering, defining areas or providing texture for instance through projects utilising a single type of stone or paving solution in multiple formats.

Our product range is supplied either on mesh or loose depending on the type of cobble. Our loose cobblestones can also be supplied in custom sizes, available upon request.
