ORGANIC WALL CLADDING

Product Specification Sheet

Organic Wall Cladding

Natural stone wall cladding is a great design ally as it adds textural and visual interest to both indoor and outdoor vertical surfaces.

Pillars, fireplace surrounds, blade walls, outdoor barbecue areas and retaining walls can be easily transformed and enlivened with the addition of natural stone wall cladding.

Choose from the cool greys and rusty orange tones of Peak or the timeless earthy tones of Mesa or take your pick at subtle creams, beiges and whites featured through Chateau, Estate and Lavato.

Our selection of organic wall cladding offers a versatile and diverse range of natural stone shades, textures and sizes that pair well with both traditional and contemporary designs.

Most products feature a sawn back and one-piece corners, ensuring efficient installation without compromise in appearance.

Products included in this collection can be grouted or dry stacked, for a more traditional look.
