OUTDOOR 20 PORCELAIN - STONE SERIES
Product Specification Sheet

PORCELAIN - STONE SERIES

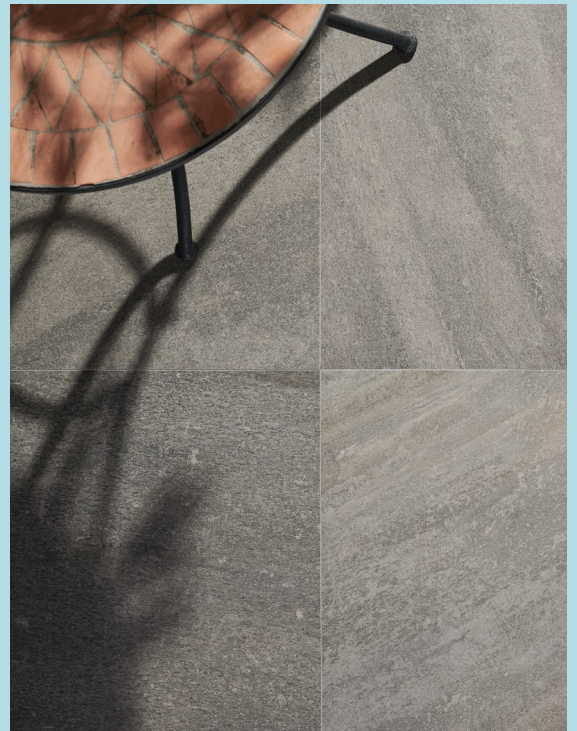

Porcelain pavers have in recent years become a sought-after choice in outdoor installations for their ultimate easy breezy nature.

Extremely dense and low maintenance, they can withstand the elements, high volumes of foot traffic and they can be laid on a variety of substrates, ranging from concrete to pedestals.

Porcelain pavers are low in porosity, impervious to staining, highly slip resistant and resilient to mould and to most chemicals making them a great solution for both residential and commercial purposes.

Our Stone Range features a wide range of natural looking prints, designed to mimic natural stone tones and textures.

These pavers are built to last and, even after years of exposure, they will retain their original look and features.
