OUTDOOR 20 PORCELAIN - TIERRA SERIES  
Product Specification Sheet

## PORCELAIN - TIERRA SERIES

Porcelain pavers have in recent years become a sought-after choice in outdoor installations for their ultimate easy breezy nature.

Extremely dense and low maintenance, they can withstand the elements, high volumes of foot traffic and can be installed on a variety of substrates, ranging from concrete to pedestals.

Porcelain pavers are low in porosity, impervious to staining, highly slip resistant and resilient to mould and to most chemicals making them a great solution for both residential and commercial purposes.

Our Spanish range of Outdoor 20 Porcelain - Tierra Series is produced with a high percentage of recycled material for a durable and environmentally friendly end result.

These high-quality pavers feature a variety of designs that blend natural stone, timber and concrete characteristics, producing a textural range perfectly suited to outdoor areas.
