Product Specification Sheet

# STEPPING STONES

A great addition to any garden or outdoor area, stepping stones can go all the way from being formal to adding a relaxed organic feel.

If you are planting your garden in a particular manner or want to connect adjacent areas, stepping stones can be the perfect solution to guide the way you experience your outdoor areas.

Stepping stones can also be used as a decorative feature or as a transition piece if the same material is utilised across the site in a paver or crazy paving format.

They also have a practical side as they allow for much better drainage than solid paths. Stepping stones can be laid in narrow or curved spaces, they're long-lasting and easy to maintain.

Married with pebbles, stepping stones create a classic combination that is wonderful to look at and easy to maintain. Grass or any type of green groundcover also work well to surround stepping stones and add an extra touch of greenery to your outdoors.

Our range of stepping stones includes organic options, perfect circles and traditional rectangular products .
