CRAZY PAVING

Irregular, organic and striking are terms that come to mind when we think about Crazy Paving. This paving format comprises one or multiple types of stone cut in a non-uniform manner and laid in a random, “crazy”, fashion.

Crazy Paving is now one of the most sought after paving styles for its uniqueness and ability to be customised.

The individual pieces are thick and dense enough to carry heavy loads without cracking, making them ideal for driveways and any heavy traffic areas. Crazy Paving also offers designers ample flexibility with its irregularly shaped pieces, perfect for narrow spaces, curves or circular designs.

Our range spans in colours, from white to purple and dark grey, and textures to suit diverse styles as well as environments.

In its simplicity, our Crazy Paving range can also easily offset any architectural or design element in its surroundings, being timber, concrete or greenery.

Delivering a fluid and dynamic overall look and feel, this paving choice can be utilised in a variety of projects, from private residential to commercial or public areas.
